

The word "RISK" is spelled out in four light-colored wooden blocks with black letters. The blocks are arranged diagonally, with the "R" at the bottom left and the "K" at the top right. The "I" and "S" are positioned between them.

Mitigation

Risk Mitigation

This is the most common method of handling risk and typically involves the use of countermeasure or safe guards.

Risk Mitigation

A large magnifying glass with a wooden handle is positioned over a document. The document has the word "RISK" printed on it in large, bold, capital letters. The magnifying glass is focused on the letter "I".

The likelihood of the risk occurring must be reduced to the absolute minimum

Risk Mitigation

- Risk = website could be taken down as a result of DDoS attack
- Can be mitigated by establishing additional data centers ensuring server redundancy.

Risk Mitigation

- Risk = talented employee could be lost to rival company
- Can be mitigated by increasing salary and offering additional bonuses
